PROBLEM OF TARGET USER

The Triple Volatility Crisis

Best-fit target users: Malaysian orchard agri-SMEs with sufficient operational and financial records to unlock accurate AI decisions.

TARGET USER · Orchard-focused agri-SMEs

Biological Risk

Fertilizer waste, pest outbreaks and soil degradation quietly erode yield before harvest failure becomes visible.

Meteorological Risk

Climate shifts and erratic rainfall disrupt flowering cycles and compromise premium fruit quality grades.

Market Risk

Sudden price crashes in export markets wipe out seasonal profits overnight — even when production is healthy.

3 compounding risks + rising compliance pressure = volatile cash flow

BioFin turns this volatility into verified, actionable decisions for data-ready SMEs.

YTL*AI LABS

SOLUTION

The “Triple Threat” Architecture

From raw farm inputs to autonomous financial action — aligned to the live product flow.

Raw Inputs

Receipts · soil reports · IoT data
Unstructured data.

Digitization

1. AI OCR
Instant digitization.

Aggregation

2. Python Aggregator
Compresses 20k+ rows.

Autonomy

3. Agentic Ledger
Autonomous financial decisions.

Raw inputs → instant digitization → verified aggregation → autonomous financial decisions

ADVANTAGES

Why BioFin wins

Verified intelligence — not generic AI.

Weather risk × market shock → ADVANCE HARVEST by 48 hours

One recommendation. RM30,000 protected.

Zero numerical hallucinations

Pandas/FastAPI computes statistics before AI reasoning.

Causal financial defence

Weather + market + operations become a single action.

End-to-end agri-finance stack

Biological data + compliance + ROI in one workflow.

Live, judge-verifiable pipeline

Next.js, FastAPI, Open-Meteo, Tavily and OCR routing.

BUSINESS PLAN

Mandated market → profitable SaaS

Regulation drives adoption. Data volume scales revenue without headcount.

Revenue engine

RM500

per SME / month SaaS

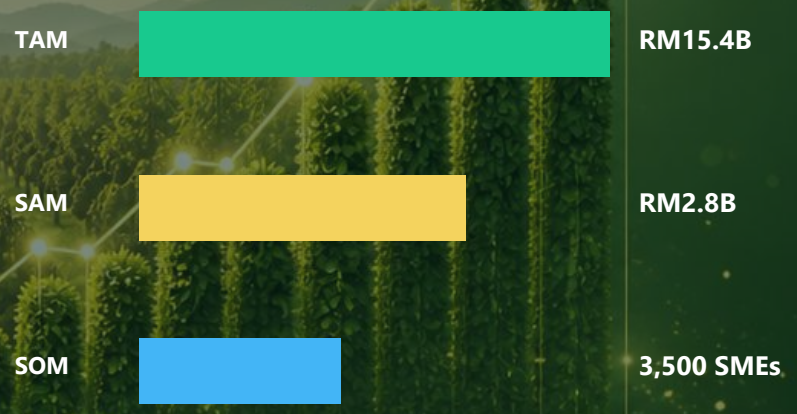
75%

target gross margin

22.5x

LTV / CAC

Market + traction path



Y1 RM0.6M → Y2 RM2.7M → Y3 RM13.7M

Go-to-market

Phase	Time	Target
Soft Launch	M1–4	50 SMEs
Regional Expansion	M4–12	250 SMEs
Enterprise Scale	M12–18	Breakeven

Cooperatives first → regional expansion → banks + SEA rollout

ASK

RM750,000 pre-seed

18 months to commercial launch
